Introduction

Becky Guo is a London-based Fashion and Textile Print Designer specialising in nature-inspired print design. Influenced by biomimicry, botanical research, and contemporary innovation, she creates thoughtful surface patterns and textile concepts that connect nature with modern lifestyles.

Her multidisciplinary approach combines fashion, textiles, and digital technologies to transform organic forms into distinctive prints and visual stories. Through her work, Becky seeks to celebrate the beauty of the natural world, bringing fresh perspectives, creativity, and environmental awareness into everyday experiences.

Entangled Beauty

Inspired by parasitic
plants: concealment,
emergence, growth and
transform.

Colours extracted from Hydnora Africana, Balanophora, cytinus and corals

Flock drawing using MX dyes and reinterpret corals and parasitic forms

Fashion visualisation development

Womensware Spring&Summer 27/28

Materials: Silk organza, silk satin crepe, silk satin and silk viscose velvet

Techniques: Digital repeats, puff and polychromatic printing, hand embroidery and couching

CryoBotanica

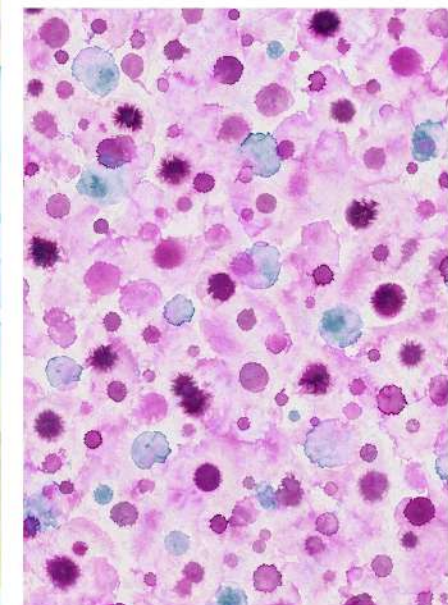

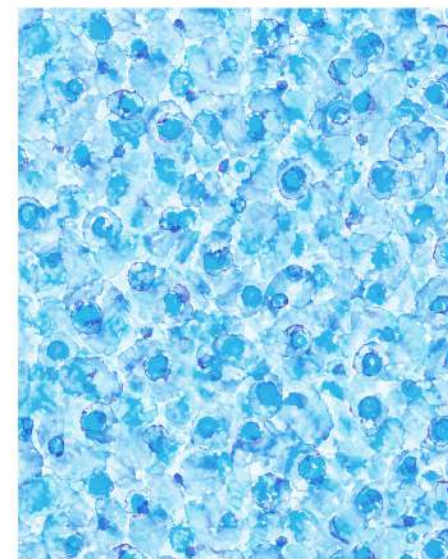

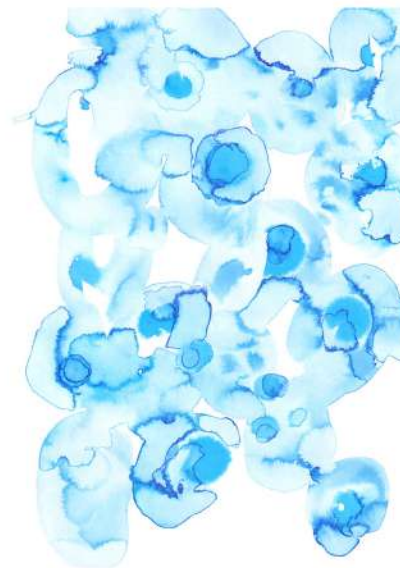

Salty ice plant, ghost plant, corpse flower and thismia

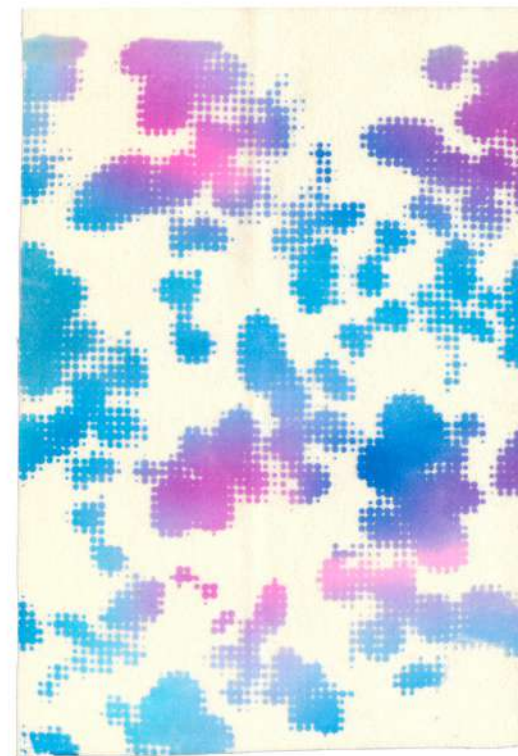

Colours extracted from
minerals and hidden botanicals

High-end Womenswear
Autumn& Winter 2027/2028
Materials: Silk viscose
Techniques: Sublimation painting and
mineral digital repeats

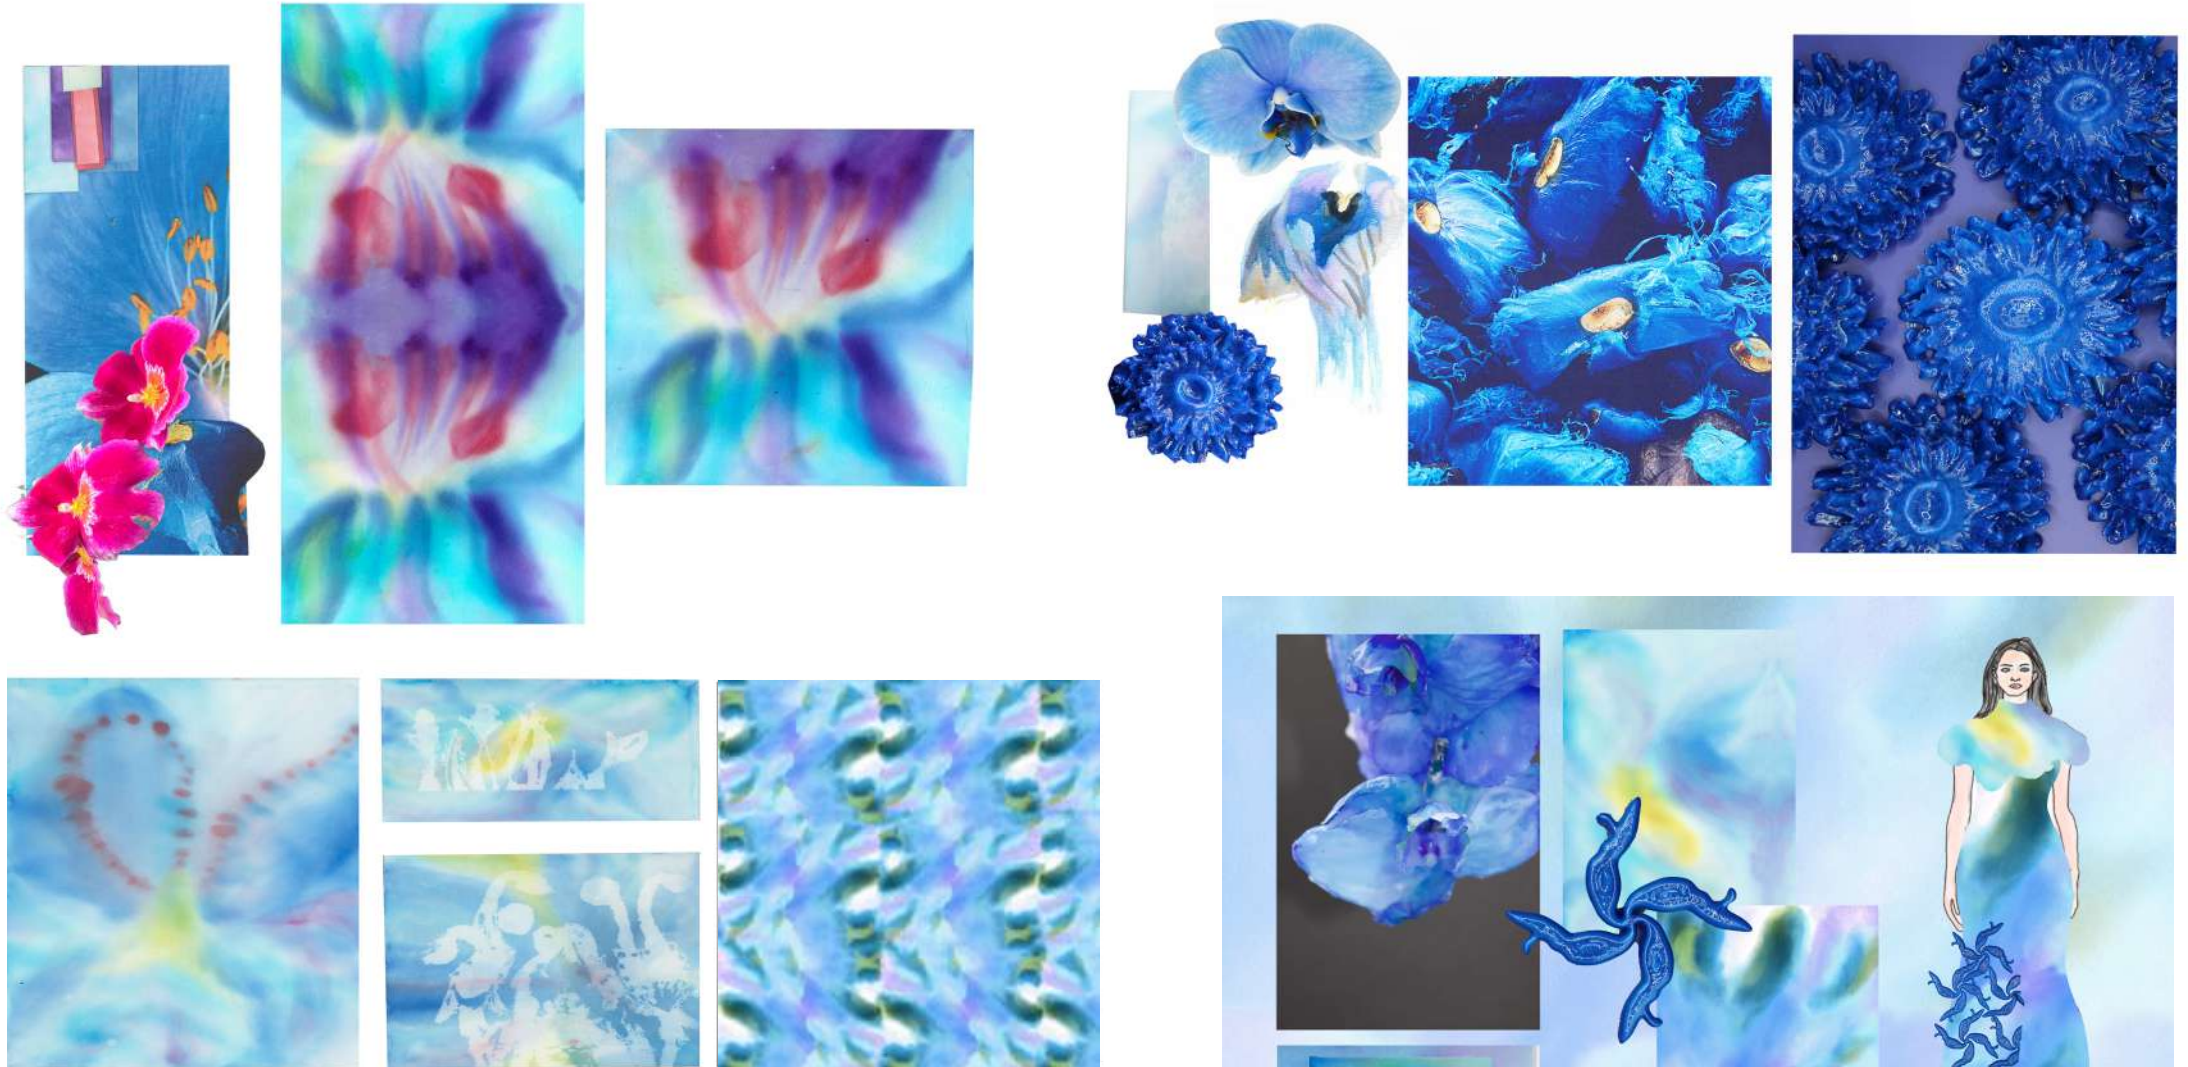

Materials: Pure wool, silk satin
Techniques: Dylon dye, polychromatic
printing and flock printing

Materials: Silk PLA, poly boucl, silk and glass organza
Techniques: pleating, ruffle, 3D printing, digital repeat

Symphony Of Survival: Botanical Insight
Unravel the hidden beauty of autotroph and heterotroph plants
through metamorphosis, mechanisms, adaptation and escapism

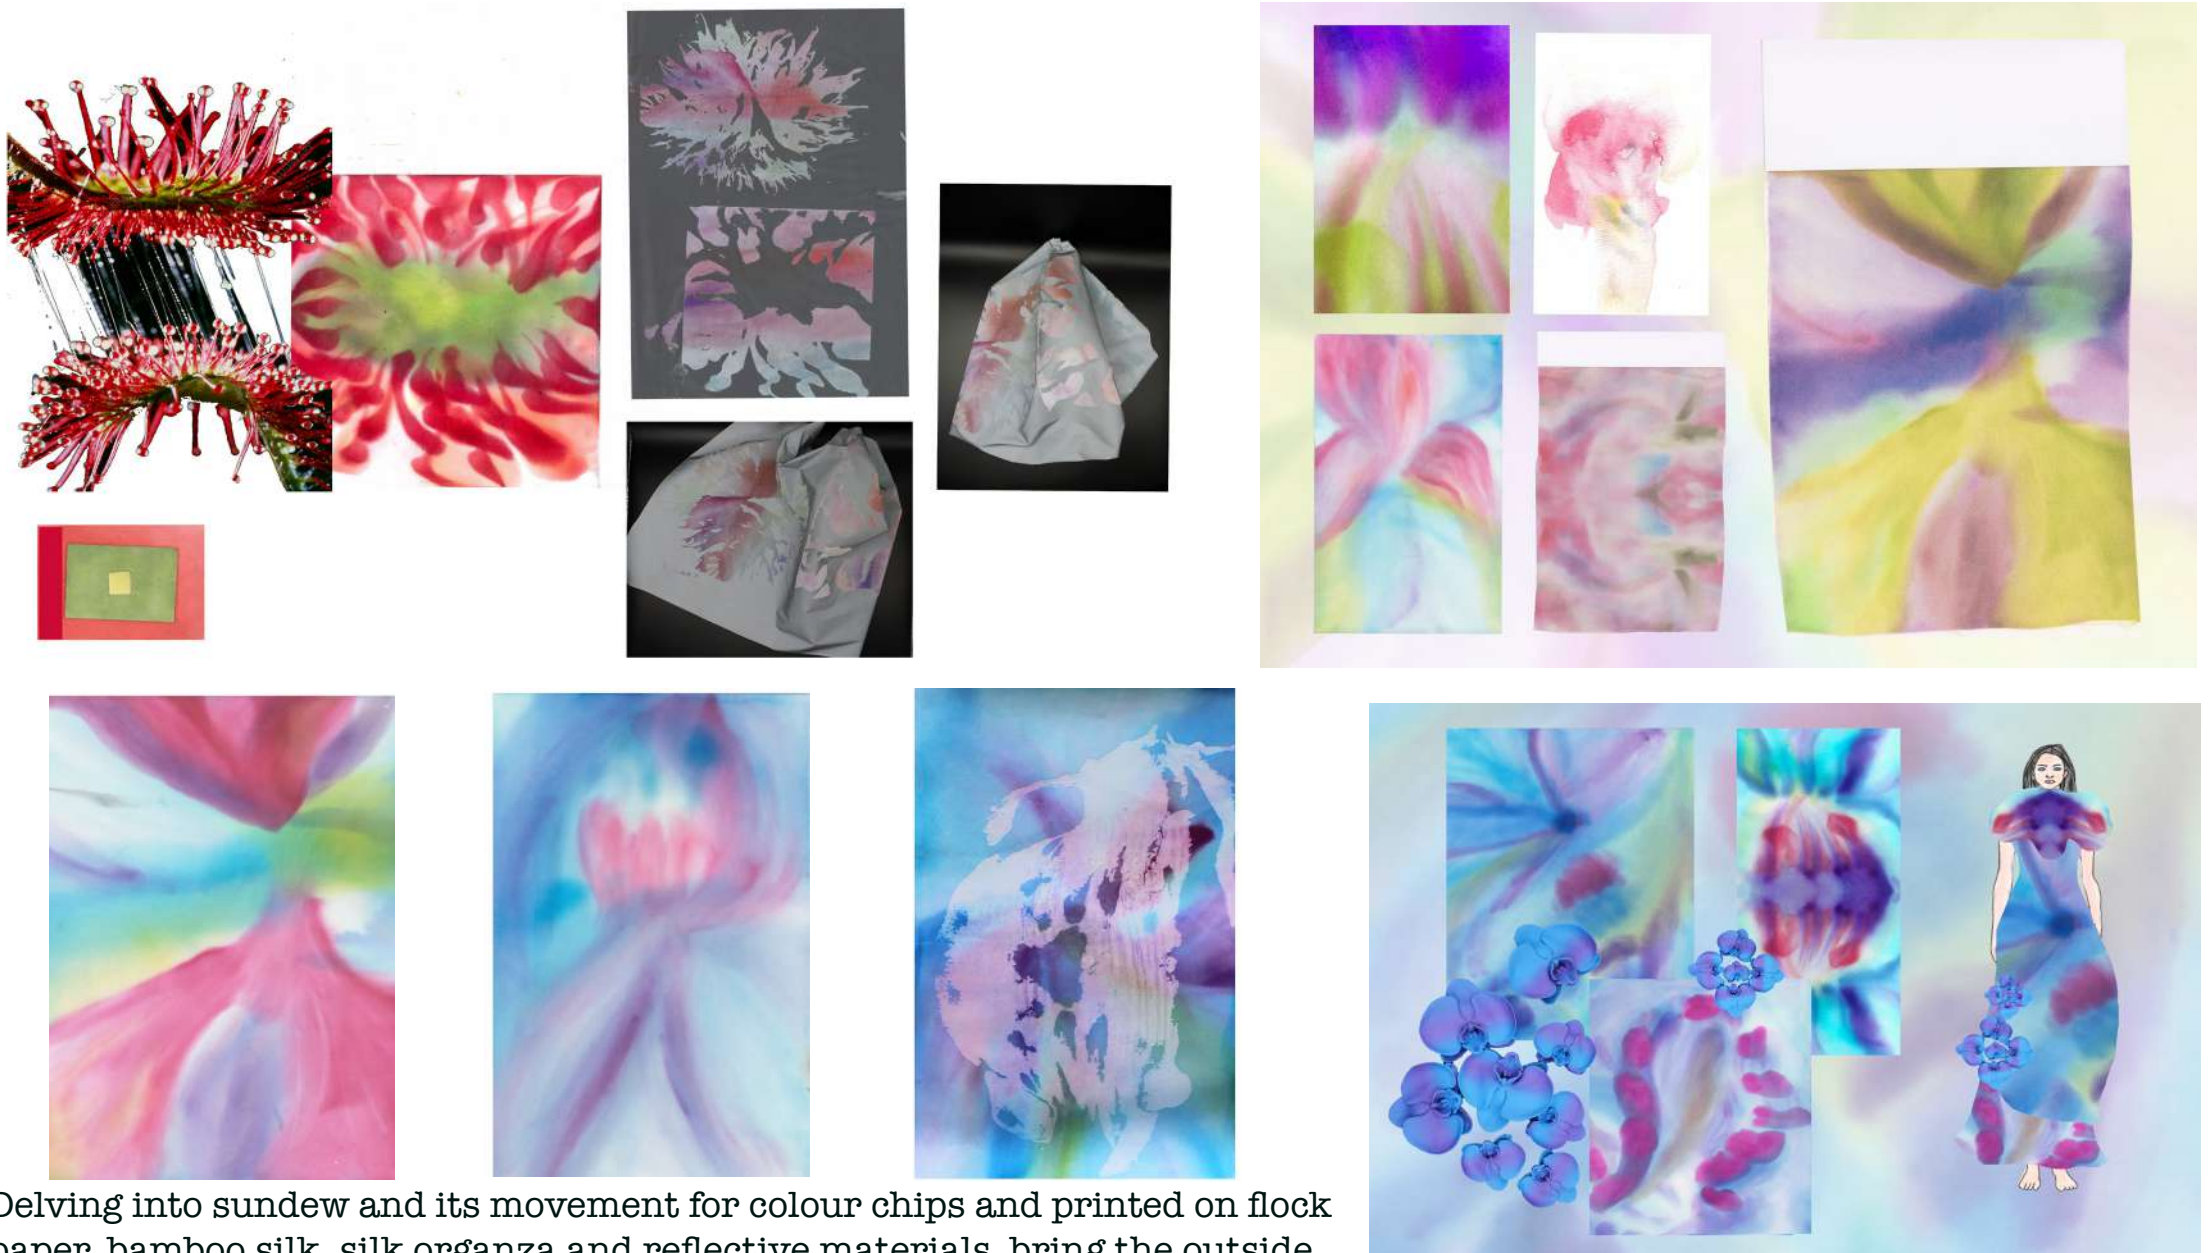

Colours, shapes and texture are extracted from Forget me knot , Orchid and Traveller Palm seed , into drawings, direct dye painting, digital repeat, 3D printing and flocking on Bamboo silk.

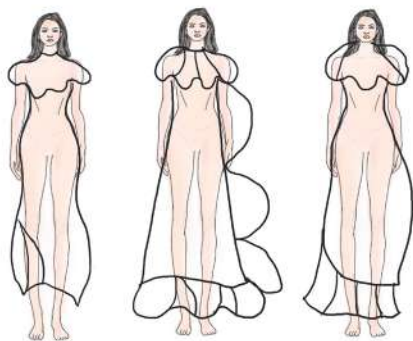

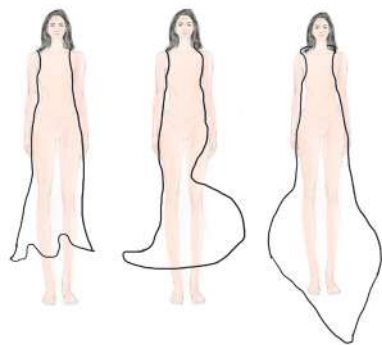

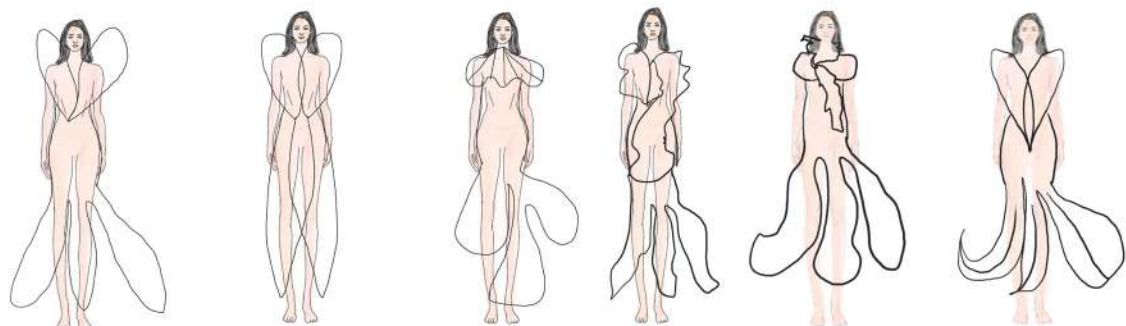

A rarity of plants including ghost plant, Munroidendron racemosum, orchids and tulips for observational drawings and merging other species to form a new plant

Delving into sundew and its movement for colour chips and printed on flock paper, bamboo silk, silk organza and reflective materials, bring the outside world in, to encourage the audience to become the escapist they dream of.
